OCO

Dear Mr. Savage:

The purpose of this letter is to request that the Illinois Environmental Protection Agency (IEPA) conduct a Resource Conservation and Recovery Act (RCRA) inspection at American Waste Processing, Maywood, Illinois and Safety Kleen, Elgin, Illinois.

The United States Environmental Protection Agency's (U.S. EPA) Off-site Policy requires that off-site commercial facilities, such as American Waste Processing and Safety Kleen, that receive hazardous substances from Superfund sites be inspected every six months. Our records indicate that American Waste Processing was last inspected by IEPA on May 2, 1986, and a record review was conducted for Safety Kleen on October 22, 1986. Therefore, to assure compliance with the Off-site Policy, we request that IEPA conduct a RCRA compliance inspection at American Waste Processing and Safety Kleen during February 1987.

If you should have further questions in this matter, please feel free to contact Ron Kolzow of my staff at (312) 886-4445.

Sincerely yours,

William E. Muno, Chief
RCRA Enforcement Section
